## **Event Description, including targets groups and objectives**

This learning, teaching, and training event takes place at Åbo Akademi University, Centre for lifelong learning in Turku in Finland. Being the first open event in this project, the days in Finland will set the stage for the staff of the organisation with their participants, enable interested participants outside the project to attend the event and spread the information in Finland about the ongoing project. The event will be three days and will include a combination of lectures and workshops that focus on our different perceptions about core elements of sustainability and resilience. The staff within the Centre for lifelong learning has a long tradition of working for sustainability on different levels, e.g. within national and international university networks, by open university courses and through teacher in-service education. Researchers, an invited lecturer and the project group members from both Nav Sweden and Åbo Akademi University will provide the content for the sessions, content that will be both practical and theoretical. The goals for the event in Finland, 2021 are the following:

- To allow the participants to engage in in-depth discussion about their perceptions of e.g. sustainable development, climate anxiety, resilience and competence to act.
- To exchange experience in order to develop Storyline as a pedagogical approach with a special focus on the teacher's and the student's role in the approach.
- To discuss the concept of entrepreneurial learning and to compare how the concept and competence is visualised in the different national curriculums.
- To discuss if and how transformative learning could be used within learning for sustainability.
- To explore the creative use of technology for educational purposes in the different workshops.
- To collect empirical material to use as a ground for further planning and for research within the project. Taking part in the different activities and associated results from the participating organisations, allows for bringing new innovative ideas together, renewing the Storyline activities and for further international discussions on how to include issues of sustainability in Storyline activities, that are relevant to the future generations. Tangible outcomes from the Finland Event includes collected knowledge about challenges of sustainability and the development of a resilient society, educational shift regarding issues of sustainability, entrepreneurship and how to see the student as an active partner in the learning processes. Tangible outcomes are also empirical material for further use and five short (1-3 min) films. The films will cover the essence of the meeting from different viewpoints (teacher, researcher, stakeholder, student/pupil etc).

Åbo Akademi University, NAV Sweden, Backatorpsskolan and partners in Erasmus+ project welcome you online and to Turku in Finland. Our partners in the Strategic Partnerships for school education are: Østfold University College, Storyline Sweden, The University of Gothenburg, Katarinaskolan, The Primary School OS Ob Rinzi
