

The puzzle method, each student know a little part

- The students are divided into groups
- The material (text, film or picture) is divided into parts
- Each student in the original group get one part to study
- The students meet in crossgroups to discuss what's important in the part they are studying. They prepare to tell their original group
- The students meet in the original group and tell each other about their part
- All students make sure that they have understood the whole material
- The original groups get some more difficult questions or problems to solve.
- The solutions are presented to the class

Step 1: Groups where the students study one parts each of the material

Step 2: The students discuss their part in crossgroups with others who have been given the same part

Step 3: Presentation in original groups. Problem solving
